

Ekene Masha

Ottawa, ON. | 343-777-9421

mashaekene1313@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY: Software Engineer with experience building and troubleshooting web applications across full-stack environments. Improved application reliability and debugging efficiency through structured testing, REST API development, and backend service design. Experienced working in Agile teams using Git-based workflows, containerized environments, and Linux-based tooling to support modern CI/CD style development pipelines. Strong foundation in JavaScript ecosystems, backend APIs, SQL databases, and microservice-oriented architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C#, PHP, SQL.

Frameworks & Libraries: React, Next.js, Express.js, Flask, ASP.NET Core, Entity Framework, Laravel.

Backend & Architecture: REST API Development, Microservices Architecture, Authentication & Authorization, Backend Logging, API Integration.

DevOps & Tools: Git, GitHub, Docker, CI/CD Concepts, Linux-based container environments, Agile SDLC.

Databases: SQLite, MySQL, MongoDB, SQL Server.

Testing: Unit testing fundamentals, structured test validation, defect reproduction and debugging.

AI & Data Training: AI Data annotation, LLM evaluation, prompt writing, output validation, quality review.

Soft Skills: Proven ability to collaborate in Agile teams, communicate technical concepts clearly, and adapt quickly to new technologies and requirements.

PROFESSIONAL EXPERIENCE

UPS

Delivery Driver

Ottawa, ON.

Oct 2025 – Present

- Manage daily delivery routes efficiently, demonstrating strong time management and attention to detail.
- Troubleshoot and resolve delivery issues independently, showcasing problem-solving and customer service skills.
- Adapt to changing routes and conditions using quick decision-making and situational judgment.
- Utilize digital tracking systems and delivery apps to monitor progress, update records, and ensure timely deliveries.

Invisible Technologies

AI Data Trainer

Remote (Ottawa, ON.)

June 2025 – Oct 2025

- Improved AI model evaluation accuracy by identifying reproducible defects in generated outputs and documenting structured bug reports for engineering teams.
- Increased dataset validation efficiency by analyzing structured data using SQL review processes and enforcing quality standards across large evaluation sets.
- Reduced recurring output errors by delivering actionable technical feedback during Agile review cycles.
- Strengthened engineering debugging workflows by documenting edge cases and defect patterns used to improve model performance.

The UPS Store
Web Designer/ IT Support

Ottawa, ON.
Sept 2024 – Oct 2025

- Reduced recurring website errors by diagnosing frontend and backend defects and implementing structured debugging across database-driven workflows.
- Improved system reliability by resolving staff-reported application issues involving login errors, browser conflicts, and database inconsistencies.
- Accelerated deployment stability by introducing pre-deployment testing procedures that validated application changes before production updates.
- Decreased recurring technical incidents by documenting reproducible bugs and maintaining internal technical records for issue tracking.
- Supported end-users across Windows systems while troubleshooting web application behavior in modern browsers and backend services.

The UPS Store
Customer Service Representative

Ottawa, ON.
Nov 2023 – Sept 2024

- Improved transaction accuracy by monitoring order processing systems and identifying discrepancies in package tracking workflows.
- Reduced onboarding time for new employees by training staff on operational systems and technical procedures.
- Strengthened service efficiency by troubleshooting customer shipment issues and resolving system errors within internal tracking software.

EDUCATION

Algonquin College of Applied Arts and Technology
Diploma in Web Development and Internet Applications

Ottawa, ON.
2025

PROJECTS

Plant Plotter – Full-Stack Garden Planning Application
React, Node.js, Express, MySQL, Docker
Role - Backend Developer

- Improved API performance by designing RESTful endpoints and optimizing SQL queries, reducing database response times and improving data retrieval efficiency.
- Strengthened application security by implementing authentication and authorization controls that protected user-specific data across service endpoints.
- Increased deployment consistency by containerizing backend services using Docker within Linux-based environments, enabling reproducible builds for development and testing.
- Improved debugging speed by implementing structured backend logging and middleware error handling to isolate reproducible defects.
- Enhanced application scalability by designing modular backend services following microservice-oriented architecture principles.
- Supported CI/CD style development workflows by managing version control through Git and maintaining structured commit and release practices.
- Improved system stability by validating API functionality through structured testing and reproducible bug identification during development cycles.
