PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience designing, building, and deploying web applications from backend APIs to production cloud infrastructure. Proven ability to improve application performance, implement secure authentication workflows, and ship reliable software across Agile environments. Strong foundation in JavaScript ecosystems, REST API development, SQL databases, and cloud deployment using Azure and Vercel.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C#, PHP, SQL

Frameworks & Libraries: React, Next.js, Express.js, Flask, ASP.NET Core, Entity Framework, Laravel

Backend & Architecture: REST API Development, JWT Authentication, Protected Routes, Token Expiry Handling, API Integration, Microservices

Cloud & Deployment: Azure App Service, Azure VM, Vercel, DNS Configuration, CORS, Environment Variables, CI/CD Concepts

Databases: MySQL, SQLite, MongoDB, SQL Server

DevOps & Tools: Git, GitHub, Docker, Linux-based environments, Agile SDLC

Testing & QA: Unit testing, structured test validation, defect reproduction, debugging, smoke testing

AI & Data: AI data annotation, LLM evaluation, prompt writing, output validation, quality review

Soft Skills: Cross-functional collaboration, technical communication, independent problem-solving, adaptability, attention to detail

PROFESSIONAL EXPERIENCE

UPS

Delivery Driver

Ottawa, ON

Oct 2025 – Present

- Manage high-volume daily delivery routes with consistent accuracy, applying strong time management and situational judgment.
- Troubleshoot and resolve delivery issues independently, maintaining service quality under fast-paced, unpredictable conditions.
- Utilize digital tracking systems and delivery apps to monitor progress, update records, and ensure on-time delivery.

Invisible Technologies

AI Data Trainer

Remote (Ottawa, ON)

June 2025 – Oct 2025

- Improved AI model evaluation accuracy by identifying and documenting reproducible defects in generated outputs with structured bug reports.
- Increased dataset validation efficiency by applying SQL review processes and enforcing quality standards across large evaluation sets.
- Delivered actionable technical feedback during Agile review cycles, reducing recurring output errors across model iterations.
- Strengthened engineering debugging workflows by documenting edge cases and defect patterns used to improve model performance.

The UPS Store

Web Designer / IT Support

Ottawa, ON

Sept 2024 – Oct 2025

- Reduced recurring website errors by diagnosing frontend and backend defects across database-driven workflows.
- Improved system reliability by resolving staff-reported issues involving login errors, browser conflicts, and database inconsistencies.
- Introduced pre-deployment testing procedures that validated application changes before production updates, accelerating deployment stability.
- Maintained internal technical records for issue tracking, reducing recurring incidents through documented reproducible bugs.

The UPS Store

Customer Service Representative

Ottawa, ON

Nov 2023 – Sept 2024

- Improved transaction accuracy by monitoring order processing systems and identifying discrepancies in package tracking workflows.
- Reduced new employee onboarding time by training staff on operational systems and internal technical procedures.
- Resolved customer shipment issues by troubleshooting system errors within internal tracking software, maintaining service efficiency.

VOLUNTEER EXPERIENCE

OrKidstra

WordPress Developer

Ottawa, ON

April 2025 – Present

- Improved site accessibility by auditing and resolving WCAG violations including semantic heading order, missing image alt text, and landmark region errors.
- Enhanced content structure and navigation by redesigning page layouts and updating theme components to meet accessibility and usability standards.
- Maintained and updated WordPress site content, ensuring accurate program information and consistent visual presentation across pages.

EDUCATION

Algonquin College of Applied Arts and Technology

Ottawa, ON

Diploma in Web Development and Internet Applications • 2025

PROJECTS

Plant Plotter – Full-Stack Garden Planning Application • plantplotter.me

Next.js, React, Express.js, MySQL, JWT, Vercel, Azure App Service, Azure VM, Resend • Role: Full-Stack Developer

- Developed and deployed a full-stack garden planning app enabling users to create gardens, plan plant layouts, track care activities, and manage scheduled tasks — independently expanded from a group project into a live portfolio product.
- Improved production performance by reducing duplicate API calls, adding lightweight summary endpoints, caching plant library data, applying MySQL indexes, and upgrading Azure VM database resources.
- Implemented secure authentication including protected routes, expired-token handling, account deletion, and password reset with expiring hashed tokens delivered via Resend.
- Deployed across Vercel (frontend), Azure App Service (backend), and Azure VM MySQL, including custom API domain, DNS configuration, CORS, environment variables, and production smoke testing.
- Refined planner and tracker UX across desktop and mobile, including row planting controls, mobile-safe interactions, backend-backed activity tracking, and improved form readability.
